

About Us

CIBORIUS – Integrated Technology-Based Solutions

CIBORIUS is a renowned, owner-managed company with traditional values. Founded in 2006, we now have 8 branches and over 1,500 skilled employees.

Visionary and Flexible Multi-Service Provider

CIBORIUS is also a visionary and flexible multi-service provider operating nationwide, with a proven track record of numerous cross-industry projects. Our clients include major renowned companies as well as several state and federal authorities. As a pioneer in the industry, CIBORIUS relies on the use of cutting-edge technology and maintains a clear and transparent approach to IT, environmental, labor, and health policies.

Quality and Standards

Quality is measurable at CIBORIUS! We rely on industry standards and certifications to ensure the highest quality and transparency. For us, quality goes beyond mere standards – it is THE benchmark for the satisfaction of our clients.

Philosophy

All companies of the CIBORIUS Group follow a clear mission: to work innovatively, in partnership, and reliably. Our goal is to always find the best solution together with our clients. Therefore, we support and challenge our employees through optimal training and development, both externally and through our own academy, DASM.

To offer the best to our clients, we continuously optimize our processes and regularly review them. Flat hierarchies enable every employee to contribute their own ideas, which are evaluated by our quality management and implemented when necessary. This motivates, makes our processes more flexible, and continuously improves our employees.

CIBORIUS Integrated Business Solutions

We view our services as part of a customer-centric solution concept within a connected ecosystem.

Integrated Services: Professional and from a Single Source

One point of contact, one project team, one system, which develops integrated solutions based on the proven principle: "As much as necessary, but as little as possible," in a cost-effective and sustainable manner.

We are convinced that long-term customer relationships are based on trust. That is why we set high standards for our work, creating a compelling service portfolio.

Principles of the CIBORIUS Group

- **Quality Awareness**
Ensuring the highest quality in internal processes and customer project management.
- **Professionalism**
Respectful interaction with clients, colleagues, and employees.
- **Integrity**
Honesty and ethical conduct.
- **Reliability**
Professional and timely delivery of all services.
- **Transparency**
Clear and open communication.
- **Customer Orientation**
Customer satisfaction is our top priority.

CIBOTICS. The Future of Integrated Security.

The Security Industry is Changing. The work environments of the future will be heavily shaped by technology and artificial intelligence (AI). Only a balanced collaboration between humans and AI will result in a positive synergy effect. With technological advancement, the use of robots and drones for threat detection is coming to the forefront, while specialized personnel oversee their deployment and control.

Connected Solutions with Integrated Robotic Systems

CIBOTICS develops innovative solutions for the security industry to respond to changes in the market. The combination of artificial intelligence, connected sensors, and autonomously operating systems creates a new dimension of security control.

Advantages of CIBOTICS Solutions

- **Higher Efficiency**
Automation of routine tasks while maintaining consistent quality.
- **Greater Precision**
Reliable inspection of critical technical systems.
- **Increased Security**
Deployment of advanced sensors and camera technology for security guard tasks.
- **Improved Occupational Safety**
Taking over dangerous surveillance tasks.
- **Cost Efficiency**
Long-term reduction of personnel costs and errors.
- **Scalability**
Adaptability to various security tasks.
- **Higher Quality**
Automated verification of security standards, identification of irregularities, and visitor recognition in the reception area. CIBOTICS stands for a secure future through connected, intelligent, and adaptable technologies that meet the demands of the modern security industry.

Surveillance Drone

BEEHIVE Aerial Robot

Facility inspection / flight patrols / video documentation

Surveillance Robot

SPOT Walking Robot

Highly agile / modular payloads / indoor & outdoor tasks

ARGUS Patrol Robot

Perimeter protection / outdoor inspection / maximum weather resistance

Reception Robot

PROMOBOT Service Robot

Appointment management & booking system
multilingual communication / visitor data collection and management / scan, print, and payment systems
Bidirectional audio & video communication

Mobile CIBOTICS Patrol

MOBILE SECURITY SERVICES with Robotics

Remote-controlled, fully autonomous, as a companion element on-site / permanently networked and responsive / efficient patrolling of large areas

// Security Solutions with Vision and Quality Standards

CIBORIUS Security proactively responds to the demands of the market and society, redefining security. We stand for innovation, certified expertise, and trusted customer relationships.

// Tailored Solutions for Your Needs

- **Custom Solutions:** "As much as necessary, as little as possible." We analyze risks and determine your specific needs: cost-effective, while maintaining consistently high quality.
- **Wide Industry Range:** We cover a broad spectrum of industries, ranging from aviation and logistics to industry, public services, as well as track construction and construction site security.
- **Specialized Expertise:** CIBORIUS is distinguished by qualified, trained, and experienced personnel with extensive expertise and a high level of competence.

// A Selection of Our Services

More for Your Security: We offer construction site surveillance, fire protection, building security, property protection, and personal protection.

Specialized Services for Airports: Our services include passenger & luggage checks, baggage handling, reception services, and customized solutions for airport security.

Security Analyses: We conduct hazard assessments, risk analyses, preventive measures, concept creation, and security training.

Event Security: We secure events with area, fire protection, and evacuation planning, as well as the provision of rescue personnel.

Property Protection / Industrial Security: We offer, among other things, security analyses, comprehensive access controls, alarm tracking, video surveillance, and the establishment of an in-house fire department.

Emergency and Service Control Center

CIBORIUS operates a state-of-the-art Alarm and Service Control Center (NSL) in Frankfurt am Main. Every day, we coordinate thousands of security-related reports across Germany – coming from security experts, networked security technology, and autonomously operated CIBOTICS robots. Our security personnel monitor incoming emergency, malfunction, fire, or intrusion alerts around the clock. The NSL enables simultaneous remote surveillance of multiple locations and properties.

Advantages of our 24/7 NSL

- 24/7 monitoring
- Nationwide connectivity
- Strict alarm and intervention protocols
- Specialized intervention personnel
- Cooperation with police and fire departments
- Logging of incidents and measures taken

Business Service - Competence and Professionalism

CIBORIUS provides your company with trained personnel for service duties. Our employees represent your business with competence and professionalism.

We understand how important external perception is for your company. That's why you can rely on our professionalism, courtesy, and expertise – whether at the reception desk, trade fair booth, or on the phone.

// Mail and Telephone Services

We handle your telephone service to ensure optimal customer accessibility, even outside your office hours. Our flexible office services adapt to your needs – during business hours or around the clock.

// Personal Service

Our chauffeur service provides tailored transportation for VIPs, artists, at-risk individuals, business trips, and shuttle services, with a strong focus on maximum security and discretion.

// Trade Fair Service

For a successful trade fair presentation, we offer experienced trade fair hostesses and promoters, as well as multilingual staff for international exhibitions, ensuring optimal engagement with your target audience.

Our Values

Everything from a Single Source

We integrate all your needs into one solution, allowing you to leverage the full potential of our interdisciplinary teams.

Regulatory Compliance

We ensure adherence to local and global regulations, as well as health and safety standards.

Quality and Cost Efficiency

We optimize quality and costs to reduce your fixed expenses and enhance the working environment.

Customer and Employee Satisfaction

Our services improve experiences, strengthen your reputation, and provide competitive advantages.

Facility Management – A Holistic Approach

Our facility management services ensure the maintenance and efficient operation of your buildings and facilities. With an expert team and state-of-the-art technology, we continuously optimize building processes to enhance cost-effectiveness and reduce operational expenses in the long term.

// CIBORIUS – Expert Service from Professionals

1. **Seamless Building Operations:** The flawless functionality of building technology is essential for uninterrupted operations.
2. **Optimal Conditions for Your Core Business:** We take care of smooth processes in the background so you can fully focus on your core business.
3. **Cutting-Edge Digital Solutions:** From sensor technology and robotics to the Internet of Things (IoT) – we provide expert advice on modern technological solutions.
4. **24/7 Service:** We are available around the clock to ensure your building operations run smoothly, even in unexpected situations.

// Our professional multi-services

Facility Services: Cleaning Services / Janitorial Services / Winter Maintenance
Green Space Maintenance

Space Management: Space requirement analysis, evaluation, and planning
Organization of workplaces

Interior Construction: Fire protection / Ventilation systems / Air conditioning technology

Social Services: Housing creation and support / Catering services / Supply and childcare / Leisure activities and language mediation / Social services to strengthen communities

Technical Facility Management: Definition of maintenance schedules
System monitoring / Regular maintenance / Commissioning of systems
Electrical installations / Lightning protection systems / Programming of control and automation technology

- Building and Operational Technology
- Climate Control Technology
- Cleaning Services
- Green Space Maintenance
- Winter Maintenance
- Janitorial Services
- Hygiene Services
- Facility Management
- Electrical Installation

Networking Your Security Technology

We integrate innovative technologies for seamless building and space surveillance into your daily operations. Our advanced security systems enable 24-hour remote monitoring with real-time responses.

// Intelligent Security Solutions for Your Business

- **Intruder and Hazard Alarm Systems**
Intelligent intruder and hazard alarm systems utilizing robotics and AI.
- **Mobile Security**
Manage your security needs remotely. With your phone or tablet, you can maintain control at all times.
- **Video Surveillance**
Video surveillance solutions that use robotics and AI to enable precise monitoring.
- **Emergency & Service Control Center**
(Certified In-House NSL)
Fast response around the clock, 365 days a year.

// Technologies

- AccessControl:** Mechanical/Electronic/CIBOTICSSolutions/DigitalReceptionService
- Fence Sensor Technology:** Infrared, Laser, Acceleration, and Pressure Sensors
Microphone Cable Technology / Tensioned Wire Systems
- Contactless Fever Measurement:** Mobile Solutions / Individual and Group Measurement
- Emergency & Service Control Center:** Certified / 24/7 Service / Alarm Tracking for all types of disruptions/Strict Alarm and Intervention Plan
- Mobile Intruder Alarm System:** Cost-effective / Flexible / Mobile / Scalable
- Remote Video Surveillance:** Video Monitoring / Suspect Identification
Suspect Communication / Enhanced Workplace Safety
- Perimeter Security:** Perimeter Protection Systems / Use of Robotics & AI
Networked Radar Systems + Cameras + Sensors
- Mobile Video Surveillance:** Hybrid Solutions / Video Towers / Autonomous Drone Systems / AI Analysis / Live Connection to NSL

- Security Technology & Robotics: State-of-the-Art Solutions
- Complete service package from a single source
- In-house control center for integrated security solutions

- Nationwide locations for quick on-site service
- 24-hour remote monitoring with real-time response

CIBORIUS operates its own training academy, where practical and targeted training courses are offered. Here, competent specialists and managers are trained for roles in security, management, and fire protection.

Through our quality management system according to DIN ISO 9001, we ensure the highest standards of training quality.

Management Excellence

- Leadership Training
- SCRUM
- Cyber Security
- ERP Systems

Expertise & Diversity in the Security Sector

- IHK Certification Exams
- Training for Protection and Security Specialists & Masters
- Industrial Security Training Levels I – IV

Medicine & Fire Protection – Hands-On Training

- First Aid Courses
- Fire Protection & Evacuation Assistants
- Occupational First Aiders

Tailored Continuing Education

- Trainer Qualification Exam
- Violence Prevention
- Handling Victims of Sexual Violence
- Recognition of Extremist Salafism
